2019

10M Signatures & Counting

We surpassed 10 million digital signatures applied using our enterprise digital signing service (DSS), and went on to more than double it in 2020.

2020

Introducing Atlas

A high-powered, high-volume certificate platform like no other.

202X

Future & Beyond

Quantum Computing, Virtual Metaverse, AI and…?

Yesterday. Today. Tomorrow.

As your needs change and grow,
we'll be right there with you.
We're in it for the long haul.

Web and Server Security

Managed SSL/TLS

The tools, services and SSL products you need to secure internal and public servers, respond to threats, and control SSL/TLS costs.

- Issue certificates with your choice of RSA or ECC
- OV, EV, Wildcard, Intranet, Multi-domain
- Universal device, application, and browser support
- SSL configuration checker finds weaknesses and vulnerabilities in server configuration, provides remediation tips

Strong Authentication Solutions

Control access to your networks & resources

With the rising popularity in remote offices and an increase in the number of personal devices being used for work, the threat to businesses is greater than ever before.

Certificate-based authentication ensures only approved users, machines, and devices can access and operate on corporate networks

Integration with MDM platforms, such as AirWatch and MobileIron, eliminates the need for IT staff to manually install certificates on each employee mobile device

GlobalSign authentication certificates scale to accommodate businesses of all sizes, from SMBs to large enterprises, with CLM and automation technologies to simplify high-volume deployments

Document Signing

PKI-based digital signatures offer higher assurance

It’s easier than ever to enable company-wide secure digital signing for a wide range of use cases including; employee timesheets and vacation requests, finance signing off on invoices and purchase orders, legal preparing contracts, sales entering new client relationships, and more.

Signatures and Timestamping prove origin and integrity

Meet standards and requirements for compliance

Scalable deployments and integrations

Partnerships with Adobe Sign, DocuSign, HelloSign, and others, so there’s virtually no change to the end user experience

Secure Email Solutions

Protect users from phishing attacks

With S/MIME certificates, employees can easily identify whether an email is legitimate. The seamless deployment process is a win-win for IT admins and end users.

Automatic configuration options

Easy to administrate with the GlobalSign managed PKI platform

Active Directory integration

Key archival & recovery

IoT Secure Identity Solution

A secure, scalable, and interoperable, device identity service built on a single, high-performance identity cloud platform

Featuring our PKI-based IoT Identity Platform and IoT Edge Enroll device enrollment service.

Enables device identity lifecycle management

Overcomes operational PKI & enrollment challenges

Removes impediments to success

For their enterprise security needs

They trust GlobalSign

> **Working with GlobalSign was super. The team was extremely proactive, responsive, and sympathetic to some of the technical issues we were facing. There was communication and transparency throughout the implementation process. I would wholeheartedly recommend GlobalSign as a solution.**
>
> - Matteo Snidero, Director of IT Operations, Finance in Motion
